- Including machine base frame

Ergonomic manual workstation with transverse doctoring unit

The solution for long and narrow print images

The SEALED INK CUP 90 Q consists of proven TAMPOPRINT technology and is the entry-level model from our portfolio of transverse doctoring pad printing machines. It is designed for applications that require a long print image, such as catheter printing, oblong covers or housing parts. With a good basic equipment this standard machine offers an excellent price/performance ratio.

New

Compact design

The SEALED INK CUP 90 Q is a single-color pad printing machine for the realization of oblong print images that are larger than the ink/doctoring cup used. Designed as an entry-level model, this machine offers a good basis for a variety of applications.

As basic equipment this pad printing machine contains a base frame with practical storage space. This also ensures a stable stand and

Height adjustable angle table

leads to high stability. Flexibility is provided by the height-adjustable angle table, which allows quick changeover to components of different sizes.

The user-friendly touch panel is standard on all new TAMPOPRINT machines. Many machine parameters and functions can be controlled and set on the display.

Option ink residue pick-up system

The SEALED INK CUP 90 Q is prepared for the installation of an ink residue pick-up system.

Options

- Ink residue pick-up system
- Cross support

Accessories

- Adapter angle for cliché sizes 510 x 70 mm und 710 x 70 mm on request
