Applications
MEDICAL INDUSTRY
TAMPOPRINT AG is a well-established partner for the medical industry. Our automated systems are in use worldwide. We make markings, scales and decorations possible where other processes reach their limits.

Starting with the project planning, the de-risking via validation process, URS, FMEA, IQ and OQ, via FAT and SAT to the production support. Especially for the pharmaceutical industry we offer an all-round service with solutions that are unparalleled.

Our pad printing and laser fully automatic machines meet the highest quality requirements when used in multi-shift operation with high throughput speed.

Highest precision of the print image registration on convex, round or flat parts by using the pad printing process, one to multicolor, or by using the ALFALAS® laser marking process goes without saying and meets the high standards for medical products. Process monitoring by using the latest camera systems as well as their validation will secure your production and the health of the patients.

Machinery construction "Made in Germany", supported by highly qualified staffs in the sales department, project management, engineering department as well as pre- and after-sales service will guarantee the professional realisation from the concept to the 24 hour production to our customers.
For an accurate dosage.
Applications

MEDICAL INDUSTRY

Counter rings
Application example

Ampoule strip
Application example

Automation for inhaler counter rings
with RAPID 2000/90

Automation for ampoule strips
with RAPID 2000/130
Applications

MEDICAL INDUSTRY

Plastic tubes, glass vials
Application examples

Laboratory tubes
Application example

Automation for plastic tubes
with pad printing machines HERMETIC and a fiber laser

Automation for inhaler counter rings
with RAPID 2000/90
