3 categories of pad printing inks

Your choice: 1- or 2-component inks

Basic ink types/shades	Standard ink types/shades	Special ink types/shades	Environmental-friendly ink types/shades	Solvent pad printing inks	UV pad printing inks
<p>Using basic inks, we offer our customers the option of mixing their own special ink shades. We will be happy to advise you and to provide you with a large number of formulations. Ink mixing system according to RAL and Pantone on request.</p>	<p>Our ink types with up to 23 standard ink shades are available in the TAMPOPRINT AG warehouse in Germany. You will receive pad printing inks ready for printing for all common applications. This area also includes European ink shades for halftone 4-colour printing (CMYK) as well as gold and silver.</p>	<p>The desired ink shade will be manufactured in our colour laboratory based on your colour specifications. Ink shade systems are: RAL, PMS, NCS, HKS K (glossy), HKS N (matt). We will find the suitable pad printing ink type also for special applications.</p>	<p>Based on current issues in dealing with environment and safety TAMPOPRINT has been developing innovative pad printing inks together with well-known manufacturers in the printing inks industry. This shows the constant innovativeness as well as the environmental awareness of our company. The ink types meet the increasing demands of our customers for pad printing inks which are free from halogen and aromatic compounds.</p>	<p>In the pad printing process both translucent halftone printing inks (CMYK) and covering pad printing inks are used in many different ink shades. The extensive spectrum on pad printing inks allows the customer to select a pad printing ink type which will precisely match their requirements. TAMPOPRINT pad printing inks meet the REACh – EU directive No. 1907/2006 and the RoHS directive No. 2011/65/EU. Depending on the printing substrate and the requirements on the resistance of the pad printing inks 1- or 2-component inks are used.</p>	<p>For special applications we offer a UV pad printing ink (1-component ink). Preferred use for high quality requirements of fast running pad printing systems. Low solvent content meets the increased environmental consciousness and ensures at the same time a reliable processing of production flow with a top quality printing result. Immediate further processing thanks to short drying times are a clear investment into the future.</p>
